PROFESSIONAL SUMMARY

I am a 3rd-year Software Engineering student at **Firat University**. I have completed project-based work in **web and mobile** application development using AI-assisted development tools. I have experience in requirements analysis, application flow planning, and development processes in map-based web applications and **AI-powered mobile projects**.

In an AI-supported mobile project, I served as a **Scrum Master**, managing sprint planning, task tracking, and team coordination. I actively contribute to technical communities by publishing software and technology-focused articles on **Medium**. I have also completed basic-level cybersecurity training with hands-on experience using security tools.

EDUCATION

Firat University

B.Sc. in Software Engineering | 2023 – 2027

- Academic training in software development, database systems, and software engineering fundamentals
- Coursework and practical studies in web development, mobile applications, and cybersecurity
- Project-based courses focused on teamwork, problem-solving, and technical analysis

GPA : 3.43 / 4.00

PROJECTS

Glowmance – AI-Powered Personalized Skin Analysis Mobile Application

AI-supported mobile application designed to analyze user-provided skin images and deliver personalized skincare recommendations.

Role: Scrum Master

Responsibilities:

- Defining and analyzing project requirements
- Designing database schema, data models, and table relationships
- Coordinating team processes and tracking progress using Agile / Scrum methodology

Second-Hand Book Marketplace – Web Application

A web-based platform that enables users to list, sell, exchange, and manage second-hand books.

Role: Scrum Master

Responsibilities:

- Conducting requirements analysis and defining user scenarios
- Designing relational database models for books, users, listings, and exchange processes
- Managing sprint planning, task tracking, and internal team communication
- Applying and reporting Agile / Scrum processes

Map-Based Web Application – Location-Based Infrastructure Issue Reporting System

A web-based system that allows users to report location-based infrastructure issues via an interactive map and enables administrators to manage these reports.

Role: Individual Project Developer (No-Code / AI-Assisted)

Responsibilities:

- Analyzed project requirements based on an academic advisor's proposed project idea
- Defined and configured data models using Prisma ORM
- Built application components using no-code and AI-assisted development tools
- Designed user interfaces and core functionalities aligned with user scenarios

EXPERIENCE (COMMUNITY / STUDENT ORGANIZATIONS)

HSD (Huawei Student Developers) – Firat University

Core Team Member / Medium Writer | 2024 – Present

- Published **software and technology-focused articles** on the Medium platform as part of content production activities
- Took an active role in organizing and supporting community events such as **CodeNight** and **Vision Fest**
- Selected as **“Writer of the Month”** after one of my articles achieved high engagement
- Developed **teamwork, communication, and technical writing skills**, with a focus on explaining complex topics clearly
- **Selected Medium Articles:**
- [CSPM ile Bulut Güvenliği: Verilerinizi Hacker’lardan Korumanın Yolu](#)
- [Dijital Dünya ve İnsan Zihni: Gerçek ile Sanal Arasındaki Çizgi](#)

TECHNICAL SKILLS

Programming Languages: C#, Java, Python

Databases: PostgreSQL, MySQL, MongoDB, Neon (basic)

Tools & Technologies: Git, GitHub, Docker, Postman

Cybersecurity: Wireshark, Burp Suite (basic), Kali Linux terminal commands

Methodologies: Agile, Scrum

CERTIFICATIONS

CODE23 – Cybersecurity Training | 2024

- Completed basic-level cybersecurity training
- Hands-on practice with Kali Linux, Wireshark, and Burp Suite

Git and GitHub Training | 2025

- Learned fundamental Git commands and core Git & GitHub concepts
- Completed hands-on version control and repository management exercises

LANGUAGES

English: A2
